

Call for Partnership Projects

2010 – International competition

Closing date
28 June 2010

Pharmascience Inc. is a fully integrated Montreal based pharmaceutical company, specialized in the manufacture and distribution of generic, innovative, and consumer brand products in Canada and abroad. Since opening its doors in June 1983, Pharmascience has developed into a major force in the Canadian pharmaceutical industry.

The Program for Pharmaceutical Innovation is an initiative aimed at identifying promising pharmaceutical development opportunities across the world and accelerating development of projects towards commercial realization through collaboration with Pharmascience. This partnership can take many forms including but not limited to licensing, co-development, and funding support. The main objective of this program is to develop a pipeline of innovative projects originating outside of Pharmascience.

Pharmascience will consider opportunities in the following pharmaceutical science categories :

- Innovation based on off-patent pharmaceutical products;
- Drug repurposing or repositioning;
- Modified formulations, reformulation or new format of delivery
 - Transdermal
 - Extended release
 - Transmucosal
 - Others

Therapeutic area of interest:

- Dermatology
- Pain management
- Niche CNS
- Substance Dependence
- Oncology

Irrespective of the therapeutic area, innovation targeting specific and unmet clinical problems will also be considered.

Eligible applicants

Pharmascience is searching for project opportunities with commercial potential from a wide variety of sources, ranging from academic and hospital researchers to pharmaceutical/ biotechnology companies as well as academic technology transfer offices.

Interested parties are invited to submit an application online at:

www.pharmascience.com/ppi
